TLI20527 Certificate II in Rail Fundamentals

Modification History

Release	Comments
1	This qualification was first released in TLI Transport and Logistics Training Package Release 19.0.

Qualification Description

This qualification provides the fundamental skills and knowledge for individuals considering a career in the rail sector or wider transport industry. It is intended to develop an awareness of the major operational areas and functions of a modern rail network to enable an informed choice related to entry level employment and/or further study in the rail industry.

This qualification is suited to Vocational Education and Training (VET) in Schools programs or other prevocational training programs where learners have no previous experience within the rail industry.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Foundation Skills Outcomes

For information regarding essential foundation skills for successful completion of the core and specialisation units and their relationship to the ACSF, refer to the TLI Training Package Foundation Skills Companion Volume.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **9 units of competency** comprising:

6 core units listed below, **plus**

3 elective units from the general elective units listed below.

Two elective units may be selected under the packaging rules from any relevant nationally endorsed Training Package or accredited course but must contribute to the vocational outcomes of the qualification.

DRAFT

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.	
Core units
